Hi Dan,
See below list from detectives and attached list from our previous discussions. The notes in Red are mine.

Hi Lt. Streker and Cmdr. Cohen,
Below is the email from Andres about the pending report request from Detectives.

Subject: SSRS requests from DB and some

Hello Lori,

Per our conversation, here are the reports that the DB would like to see.

1. Lt. Flaa would like a report that displays Case folders assigned to Detectives that are over 15 days old, and the folder does not contain case notes with a created date within that 15 days. Their Goal: they want something that "flags" supervisors of detectives that need to manage their cases better. I have already started this report, just need to figure out how to make the dates work. It is named "306090DetectiveCases test" . you can find it under training >Lopez>306090DetectiveCases test

2. Lt. Flaa wants a report to track property crimes that get sent to the DB that are workable. I have not put any thought into this one yet. So it would be best to go to the source for this one.

3. Another request I had, that was put on the back burner, was a report to list all people associated to a case folder, (i.e. arrested, suspects, witnesses etc.) I was having trouble getting the people info to come across into SSRS. I lost sight of this request but would be beneficial for crime lab

4. And lastly, just a thought. I don't know if dispatch currently receives the report you created for everyone that was booked into jail on a daily basis. If they don't, it would be beneficial for them to verify the Wanted Hotsheet is accurate.
